

# Bring Your Own Device Program

Year 3-6

## What is the BYOD Program?

The BYOD Program has been put in place to allow all students in Year 3 to learn flexibly by bringing in their own device to use at school and at home.

## What's happened to the Netbook Program?

The Netbook Program has been a huge success at Findon Primary School over the past 12 years, however, with the changes previously rolled out to schools in regards to Parent Payments, the old Netbook Program cannot be sustained. Students that are already on the existing Netbook Program will continue to run as usual, with the inclusion of the option to Bring Your Own Device. From 2024, students entering the program can join by bringing in an **eligible** device from home.

## What If I don't have a device?

If you don't have a device, you have two options if you'd like to join the BYOD Program:

- Purchase a device from a retailer
- Purchase or Finance a device through our LWT online portal (Link below)

**Devices must meet or exceed our minimum device specifications**

## Do I have to buy a device from LWT?

No, you can buy a device from any retailer (or bring one you already own). Though the device **MUST** meet our **minimum device specifications**.

## Where could I go to buy a device?

Listed below are a few retailers we recommend going to if you don't want to purchase a device from LWT.

**JB HI-FI**

**officeworks**

**Harvey Norman**

**THE GOOD GUYS**

## Can I bring an Android Tablet?

No, Android Tablets are not currently supported on the BYOD Program. Not all Android devices are compatible with our School Network as some manufacturers don't include the necessary functionality required to connect to our type of network.

## What happens if my device gets damaged?

Netbooks brought to school for the BYOD program will not be covered if damages occur.

We can assist in diagnosing physical issues, but we can only fix software issues. Damage (cracked screens, broken plastics etc.) will **NOT** be covered or insured by the school.

## MINIMUM DEVICE SPECIFICATIONS
